(54) Title: ODOR-ABSORBING CELLULOSIC FIBROUS SUBSTRATES

(57) **Abstract:** The present invention is directed to durable finishes for cellulose-containing fibers and fibrous substrates. The ac-
tive components of the finishes are hydroxyl-containing amines, and preferably trialkanol amines. When combined with a suitable
crosslinker, the amines become attached to and crosslinked on the substrate fiber, and form a soft resinous coating that is durable to
cleaning procedures. This polymeric coating imparts durable anti-microbial activity and renewable control of certain odors.
